

# JOURNEY OF THE UNIVERSE

## TOOLKIT

### About the toolkit.

This toolbox was created to help you with organizing your very own Journey of the Universe event!

Ask participants to bring their own:  
Food  
Notebooks  
Writing material

### Organizing a screening.

Organizing a screening is not just about watching a movie together. You can sparkle dialogue and conversations, and harvest insights and actions.

## THE LOCATION

### What to do with it?

Here are some decoration tips for your location:  
Use a big screen so everyone can see the movie.  
Make it relaxed and warm, so your guests will feel at home.  
It is nice to have a space where your guests can stand and start a conversation beside the place where they watch the movie.

## EXAMPLE STATEMENTS

First; use some test statements to make sure that everyone understands it.

- I think the stars are beautiful
- I look at the sky every night and day

After the test you move on to the real statements like:

- Climate change is caused by humans
- With my individual actions I can make a difference for the planet
- Humanity has influence on how our planet is evolving
- I still have hope that we can make a difference

**Tip**

Make a scale from 0 to 10 and ask your participants to move around this scale while you read the statements.  
If they agree with it they move to 10, if they disagree they move to 0!

# Different perspectives

You can reflect on the movie with your audience in various ways. Sketching different perspectives helps to gain a broader view.

Invite speakers or 'experts' from different fields of work to talk about their perception on the movie.

Use hats in different colors to literally 'put on a new perspective' while asking questions to reflect on.

You can also ask participants to share their perspective from their own field of expertise

## We can help you with:

DVD's and books  
Giving advise  
Giving feedback
