

## **The Earth Charter Index: Guidelines for developing a Country Factsheet**

Your Country Factsheet comprises of your responses to questions I to V below. Respond to each of the questions with up to 400 words (for each sub question in I to V). All responses must be balanced perspectives supported by evidence that is well referenced and written in unbiased and objective language. Please include:

- Your Country name in the footer of your Country Factsheet.
- Graphs, maps, or photos that illustrate your responses (hi resolution images in jpeg format).

In order to be considered for inclusion in the Earth Charter Index Report 2022 **we need to receive your Country Factsheet through the form below on or before 15 January 2022.**

**Your Registration Number:**

**Country:**

**Name of the person who is submitting the document**

## Questions

### I. Area in the country under forest (the square kilometres)

1. Identify the policies and actions in your country (and describe the key elements in it) that have caused an increase, decrease, or status quo of the **area in the country under forest (square kilometres)**. If possible, provide a timeline of policies, decisions and actions and their impact on the area in the country under forest from 1990 (provide, if possible, a graphic showing when the policies were introduced and when and what impact they had on area under forest).
2. What are the underlying values you identify that could have driven these policies, decisions, and actions?
3. What are the indicators that have driven these policies, decisions, or actions? Please provide any data on the indicators prior and after the decisions were made.

### II. Total energy use (energy use per capita x the population)

1. Identify the policies and actions in your country (and describe the key elements in it) that have caused an increase, decrease, or status quo of the **total energy use (energy use per capita multiplied by the total population)**. If possible, provide a timeline of policies, decisions and actions and their impact on the total energy use in the country from 1990 (provide, if possible, a graphic showing when the policies were introduced and when and what impact they had on total energy use).
2. What are the underlying values you identify that could have driven these policies, decisions, and actions?
3. What are the indicators that have driven these policies, decisions, or actions? Please provide any data on the indicators prior and after the decision was made.

### III. GDP

1. Identify the policies and actions in your country (and describe the key elements in it) that have caused an increase, decrease, or status quo of the **GDP**. If possible, provide a timeline of policies, decisions and actions and their impact on the GDP in the country from 1990

(provide, if possible, a graphic showing when the policies were introduced and when and what impact they had on GDP).

2. What are the underlying values you identify that could have driven these policies, decisions, and actions?
3. What are the indicators that have driven these policies, decisions, or actions? Please provide any data on the indicators prior and after the decision was made.

#### **IV. Longevity**

1. Identify the policies and actions in your country (and describe the key elements in it) that have caused an increase, decrease, or status quo of the **longevity**. If possible, provide a timeline of policies, decisions and actions and their impact on longevity in the country from 1990 (provide, if possible, a graphic showing when the policies were introduced and when and what impact they had on longevity).
2. What are the underlying values you identify that could have driven these policies, decisions and actions?
3. What are the indicators that have driven these policies, decisions, or actions? Please provide any data on the indicators prior and after the decision was made.

#### **V. Number of people who leave the country as refugees to another country**

1. Identify the policies and actions in your country (and describe the key elements in it) that have caused an increase, decrease, or status quo of the **number of people who leave the country as refugees to another country**. If possible, provide a timeline of policies, decisions and actions and their impact the number of people who leave the country as refugees to another country from 1990 (provide, if possible, a graphic showing when the policies were introduced and when and what impact they had on number of people who leave the country as refugees to another country).
2. What are the underlying values you identify that could have driven these policies, decisions, and actions?
3. What are the indicators that have driven these policies, decisions, or actions? Please provide any data on the indicators prior and after the decision was made.
